

Forklift Train-The-Trainer

This three-day course is designed for a person, selected by your company, to be trained on how to certify forklift operators within your own facility. The ideal candidate is someone with presentation experience and is currently a certified operator. Our program will provide that individual with the knowledge and hands-on practical experience required to effectively present the program to your operators. This program can either be held on-site at your location, or at one of our Yale Training Centres.

Length of Program: 3 days (Four Person Maximum for onsite program)

Course Content

- Introduction
